BoswelliaZyme Complex

BoswelliaZyme Complex is a dietary supplement that may support*

- Supports normal immune response
- Supports healthy joints
- Supports normal blood lipid levels

Formulated with Indian frankincense and a combination of the proteolytic enzymes serrapeptase and pancreatin extract. It supports healthy immune and normal prostaglandin response in the body. The gummy resin extracted from the boswellia tree works as a natural astringent, and the boswellic acids in this resin may help to constrict the body's tissue and act upon excessive lipopolysaccharide (LPS).

Along with Indian frankincense, these proteolytic enzymes help support structural health by breaking down proteins in preparation for absorption and utilization. Both pancreatin and Serrazimes® contain proteases, which influence the cellular signaling pathways essential for healthy immune response. These proteolytic enzymes help maintain normal blood lipid levels and aid in catalysis of organic debris in the blood. Serrazimes® and pancreatin assist in the breakdown of microbes, toxins, and foreign material and help to neutralize biochemicals (such as bradykinins) to optimal levels. Together with the boswellic acids, pancreatin and Serrazimes® support the body's normal immune response and musculoskeletal function at the cellular level.

Ingredients and Supplement Facts

Boswellia – Found under the bark of the boswellia tree is the viscous resin commonly known as Indian frankincense. Traditional Indian (Ayurvedic) healers extracted and purified this resin because of its active ingredients—four triterpene acids referred to as boswellic acids (BAs). This resin helps maintain normal prostaglandin response and helps decrease 5- lipoxygenase and human leukocyte elastase (HLE).

Pancreatin – Three main enzymes produced naturally in the pancreas—protease, amylase, and lipase—combine to form pancreatin. These enzymes break up proteins, starches, and fats respectively to be digested and absorbed by the body.

BoswelliaZyme Complex

Ingredients and Supplement Facts Continued...

Serrapeptase – A proteolytic enzyme that breaks apart proteins, Serrazimes® consists of proteases (both endo- and exo-) that enable the body to covert proteins into amino acids and help to maintain the normal function of the immune and circulatory systems.

Supplement Facts

Serving Size: 2 capsules
Servings Per Container: 30

| | Amount Per Serving | %DV |
|--|---------------------------|------------|
| Indian Frankincense (<i>Boswellia serrata</i>) Gum Resin (65% Boswellic Acids) | 424 mg | * |
| Pancreatin 8X | 192 mg | * |
| Serrazimes®-I (endo/exo-protease) | 9.64 mg | * |

* Daily Value (DV) not established.
